Development-Induced Displacement and Resettlement - Bogumil Terminski 2014-05-01
This book explores the issue of development-induced resettlement, with a particular emphasis on the humanitarian, legal, and social aspects of this problem. Today, so-called 'development-induced displacement and resettlement' (DIDR) is one of the dominant causes of internal spatial mobility worldwide. Each year over 15 million people are forced to abandon their homes to make space for economic development infrastructure. The construction of dams and irrigation projects, the expansion of communication networks, urbanization and re-urbanization, the extraction and transportation of mineral resources, forced evictions in urban areas, and population redistribution schemes count among the many possible causes. Terminski aims to present the issue of development-caused displacement as a highly diverse, global social problem occurring in all regions of the world. As a human rights issue it poses a challenge to public international law and to institutions providing humanitarian assistance. A significant part of this book is devoted to the current dynamics of development-caused resettlement in Europe, which has been neglected in the academic literature so far.

Development-Induced Displacement and Resettlement - Irge Satiroglu 2015-04-10
Every year millions of people are displaced from their homes, livelihoods and communities due to land-based development projects. There is no limit to what can be called a 'development project’. They can range from small-scale infrastructure or mining projects to mega hydropower plants; can be public or private, well-planned or rushed into. Knowledge of development-induced displacement and resettlement (DIDR) remains limited even after decades of experience and research. Many questions are yet unanswered: What is "success" in resettlement? Is development without displacement possible or can resettlement be developmental? Is there a global safeguard policy or do we need an international right ‘not to be
displaced'? This book revisits what we think we know about DIDR. Starting with case studies that challenge some of the most widespread preconceptions, it goes on to discuss the ethical aspects of DIDR. The book assesses the current laws, policies and rights governing the sector, and provides a glimpse of how the displaced people defend themselves in the absence of effective governance and safeguard mechanisms. This book is a valuable resource for students and researchers in development studies, population and development, and migration and development.

**Development-induced Displacement** - C. J. De Wet 2006

Some ten million people are displaced or resettled every year, due to development projects, often with negative results. The contributors argue that there is a complexity and tension, when trying to reconcile enforced displacement with the creation of a socio-economically viable and sustainable environment.

**Development-induced Displacement, Rehabilitation and Resettlement in India** - Sakarama Somayaji 2011-03-31

Compulsory land acquisition and involuntary displacement of communities for a larger public purpose captures the tension of development in the modern state, with the need to balance the interests of the majority while protecting the rights of the minority. In India, informal estimates of involuntary resettlement are estimated to be around 50 million people over the last five decades, and three-fourths of those displaced still face an uncertain future. Growing public concern over the long-term consequences of this has led to greater scrutiny of the rehabilitation and resettlement process, particularly for large development projects. This book examines a number of new policy formulations put in place at both the central and state levels, looking at land acquisition procedures and norms for rehabilitation and resettlement of communities. The book combines a theoretical analysis of the proposed regulatory framework with detailed case studies that examine the application of these norms in specific geographic contexts across the country. It brings together contributory analysis by some of the country’s most engaged administrators, academics, and activists in the field, and is a useful contribution to Development Studies.

**Routledge Handbook of Migration and Development** - Tanja Bastia 2020-02-14

The Routledge Handbook of Migration and Development provides an interdisciplinary, agenda-setting survey of the fields of migration and development, bringing together over 60 expert contributors from around the world to chart current and future trends in research on this topic. The links between migration and development can be traced back to the post-war period, if not further, yet it is only in the last 20 years that the ‘migration–development nexus’ has risen to prominence for academics and policymakers. Starting by mapping the different theoretical approaches to migration and development, this book goes on to present cutting edge research in poverty and inequality, displacement, climate change, health, family, social policy, interventions, and the key challenges surrounding migration and development. While much of the migration literature continues to be dominated by US and British perspectives, this volume includes original contributions from most regions of the world to offer alternative non-Anglophone perspectives. Given the increasing importance of migration in both international development and current affairs, the Routledge Handbook of Migration and Development will be of interest both to policymakers and to students and researchers of geography, development studies, political science, sociology, demography, and development economics.

**Country Frameworks for Development Displacement and Resettlement** - Susanna Price 2019-03-28

The problem of escalating population displacement demands global attention and country co-ordination. This book investigates the particular issue of development-induced displacement, whereby land is seized or restricted by the state for the purposes of development projects. Those displaced by these schemes often risk losses to their homes, livelihoods, food security, and socio-cultural support; for which they are rarely fully compensated. Bringing together 22 specialist researchers and practitioners from across the globe, this book provides a much-needed independent analysis of country frameworks for development-induced displacement spanning Asia, Africa, Central and South America. As global competition for land increases, public and private sector lenders are lightening their social
safeguards, shifting the oversight for protecting the displaced to national law and regulations. This raises a central question: Do countries have effective ways of addressing the risks and lost opportunities for their people who are displaced? While many countries remain impervious to the problem, the book also shines a light on the few who are pioneering new legislation and strategies, intended to address questions such as: should the social costs to those displaced help determine whether a project meets the public interest and merits financing? Does the modern state need powers of eminent domain? How can country laws, systems, institutions and negotiations be reformed to protect citizens better against disempowering public and private sector development displacement? This book will interest those working on forced and voluntary migration, property and expropriation law, human rights, environmental and social impact assessment, internal and refugee displacement from conflicts, environment change, disasters and development.

Development-Induced Displacement and Resettlement in Bangladesh - Mohammad Ameeruz Zaman 2017 A very first for Bangladesh, this edited book examines the complex issues of development-induced displacement and resettlement using case studies with good practice examples from a wide range of ongoing projects. The authors, who are largely practitioners in the field of resettlement studies, are well-known in the country and internationally for their expert knowledge. The book establishes a baseline for further research on resettlement and development in Bangladesh. It is rich in well-presented case studies replete with evidence-based strategies to help prevent impoverishment amongst those displaced by development projects. The chapters in this collection address emerging issues and approaches to resettlement and thus have enriched the literature in an era of rapid economic development and change. Thus, the book will remain as a valuable resource and reference or teaching aid in academic and development circles. In addition to the Foreword by Michael Cernea and the Introduction by the editors, the book contains thirteen chapters: Chapter One, Resettlement in the Jamuna Multipurpose Bridge Project: Innovations and Good Practices (Mohammad Zaman); Chapter Two, Beyond Resettlement: The SAP II Program in the Bhairab Bridge Project (Hafiza Khatun); Chapter Three, Self-Managed Resettlement by Informal Settlers in the Jamuna-Meghna River Erosion Mitigation Project (Kh. Khairul Matin); Chapter Four, Gender and Resettlement in Bangladesh (Bindiya Rawat); Chapter Five, Income and Livelihood Restoration in the Tongi-Bhairab Bazar Double Line Project (A. M. Salah Uddin); Chapter Six, The Impact of Development on Adibasi People in Bangladesh (Hafiza Khatun and Surinder Aggarwal); Chapter Seven, The Padma Multipurpose Bridge Project: The Ten Best Practices in Resettlement Management (Mohammad Zaman and Aqueel Khan); Chapter Eight, Land Acquisition and Resettlement in Urban Transport Project in Dhaka City: Experience and Innovations (Akhtar Zaman); Chapter Nine, Resettlement in RCIP-Rail Projects: A Review of the Planning Experience (Saifulla Dostogir and Akhtarul Islam Khan); Chapter Ten, Resettlement Planning and Implementation: Making Things Happen (Albab Akanda); Chapter Eleven, Training and Capacity Building in Resettlement Management: The MLARR Program at BRAC University (Ferdous Jahan and Sharif A. Wahab); Chapter Twelve, External Monitoring in CEIP-1 Project: Review and Early Experience (Jan T. Twarowski); and Chapter Thirteen, Toward a Land Acquisition and Resettlement Law for Bangladesh: Issues for Consideration (Mohammad Zaman and Hafiza Khatun).

Lose to Gain - Jayantha Perera 2014-04-01 A crucial issue that confronts development in South Asia is how to build a better life for people displaced by infrastructure development projects. This book comprises recent displacement and resettlement case studies conducted by eight anthropologists in South Asia. Each contributor wrote around the key theme of the book: Is involuntary resettlement a development opportunity for those displaced by development interventions? In this book, "resettlement" carries a broader meaning to include physical and economic displacement, restricted access to public land such as forests and parks, relocation, income rehabilitation, and self-relocation. The book demonstrates that despite significant progress in national policies, laws, and regulations, their application still requires more commitment, adequate resources, and better supervision.

Displaced by Development - Lyla Mehta
2009-01-06 This compilation is a rare attempt to apply gender analysis to development-induced-displacement and resettlement in the Indian context. It brings together leading scholar-activists, researchers and contributors from people’s movements to critique and draw attention to the injustices perpetrated during such processes. Facing up to the need to focus specifically on how displacement and resettlement affect social groups differently with regard to axes such as gender, class, caste and tribe, the articles show that disenfranchised groups are deemed dispensable and tend to be affected the most, and that women and children among them suffer disproportionately. Displaced by Development: Confronting Marginalisation and Gender Injustice argues that without differentiated analyses and programmes, displacement and resettlement will continue to intensify and perpetuate gender and social injustice. This work will hold the interest of a wide readership and will be a crucial source of information for those working in the areas of Gender and Social Policy, Economics and Development Studies, Sociology of Gender, Environment and Development, Migration Studies, Anthropology, and South Asian studies. It will also interest policy makers in development agencies, activists and non-governmental organisations concerned with forced displacement and migration issues.

Toward Local Development and Mitigating Impoverishment in Development-induced Displacement and Resettlement-Dolores Koenig 2002

Development's Displacements-Peter Vandergeest 2010-10-01 As multilateral agencies, social movements, and state authorities worldwide struggle to cope with the effects of large-scale development projects, the problem of displacement remains unresolved. This volume seeks to address displacement as a broad and multilayered phenomenon. A series of illustrative case studies drawn from around the globe provide causal accounts of why and how displacement occurs, what its effects on communities, ecosystems, and economies look like, and the normative or ethical positions held by key actors involved. Contributors offer economic, political, and cultural analyses, as well as extensive ethnographic field research, to present a picture of displacement that illustrates the depth and the breadth of the issue.

Development-induced Displacement and Human Rights in Africa-Romola Adeola 2020-09-22 Within the context of the 2009 Kampala Convention, this book examines how a balance can be struck between the imperative of development projects and the rights of persons likely to be displaced in Africa. Following independence, many African states embarked on large-scale development projects such as dams, urban renewal and extraction of natural resources and have had to grapple with how to protect displaced communities while implementing development projects. These projects were considered a panacea for Africa’s development and the economic interests of the majority were often considered over and above the interests of the minority of people who were displaced by these projects. This book examines how a balance can be struck between the imperative of development and the rights of displaced persons within the context of the African Union Convention on the Protection and Assistance of Internally Displaced Persons in Africa (the Kampala Convention). Romola Adeola analyses the obligations that are placed on African states by the Kampala Convention in the context of development-induced displacement. This book will be of interest to scholars of human...
Geography in Bangladesh—Sheikh Tawhidul Islam 2019-04-30 This book provides an overview of the emergence of geography as a discipline in Bangladesh and the contributions made by local geographers towards the development of the country. It explores problems associated with population growth and poverty, landlessness and food security, land use and natural resource management, urbanism, climate change, disaster management and human health. The volume shows how research and the study of geography in the 'periphery' can contribute in achieving progress in countries like Bangladesh and help them prepare against imminent disasters, ecological, social, economic shocks and uncertainties. This book will be useful to students and researchers of geography, environment studies, disaster management, development studies, geoinformatics, geology, demography, sociology and South Asian studies with a particular focus on Bangladesh. It will also interest various policy makers and NGO professionals working in these and related fields.

Towards Local Government and Mitigating Impoverishment in Development-induced Displacement and Resettlement—Dolores Koenig 2001

The Economics of Involuntary Resettlement—Michael M. Cernea 1999 Content Description
#Includes bibliographical references.

Development & Dispossession—Anthony Oliver-Smith 2009 More people were involuntarily displaced in the twentieth century than ever before, and not only by war and natural disasters. Capital-intensive, high-technology, large-scale projects compel the displacement and resettlement of an estimated 15 million people every year in the process of converting farmlands, fishing grounds, forests, and homes into reservoirs, irrigation systems, mines, plantations, colonization projects, highways, urban renewal zones, industrial complexes, and tourist resorts. Aimed at generating economic growth and strengthening the region or nation, these projects have all too often left local people permanently displaced, disempowered, and destitute. Resettlement has been so poorly planned, financed, implemented, and administered that these projects end up being "development disasters." Because there can be no return to land submerged under a dam-created lake or to a neighborhood buried under a stadium or throughway, the solutions devised to meet the needs of people displaced by development must be durable. The contributors to this volume analyze the failures of existing resettlement policies and propose just such durable solutions.

Understanding Impoverishment—Chris McDowell 1996 Infrastructure development projects are set to continue into the next century as developing country governments seek to manage population growth, urbanization and industrialization. The contributions in this volume raise many questions about 'development' and 'progress' in the late twentieth century. What is revealed are the enormous problems and disastrous affects which continue to accompany displacement operations in many countries, which raise the ever more urgent question of whether the benefits of infrastructure development justify or outweigh the pain of the radical disruption of peoples lives, exacerbated by the fact that, with some notable exceptions, there has been a lack of official recognition on the part of governments and international agencies that development-induced displacement is a problem at all. This important volume addresses the issues and shows just how serious the situation is.

displacement and resettlement (DFDR) is a critical problem on the international development agenda. The frequency of forced displacements is rapidly increasing, the sheer numbers of uprooted and impoverished people reveal fast accelerating trends, whilst government reporting remains poor and misleading. Challenging the Prevailing Paradigm of Displacement and Resettlement analyzes widespread impoverishment outcomes, risks to human rights, and other adverse impacts of displacement; it documents under-compensation of expropriated people, critiques cost externalization on resettlers, and points a laser light on the absence of protective, robust, and binding legal frameworks in the overwhelming majority of developing countries. In response, this book proposes constructive solutions to improve quality and measure the outcomes of forced resettlement, prevent the mass-manufacturing of new poverty, promote social justice, and respect human rights. It also advocates for the reparation of bad legacies left behind by failed resettlement. It brings together prominent scholars and practitioners from several countries who argue that states, development agencies, and private sector corporations which trigger displacements must adopt a "resettlement with development" paradigm. Towards this end, the book's co-authors translate cutting edge research into legal, economic, financial, policy, and pragmatic operational recommendations. An inspiring and compelling guide to the field, Challenging the Prevailing Paradigm of Displacement and Resettlement will be of interest to university faculty, government officials, private corporations, researchers, and students in anthropology, economics, sociology, law, political science, human geography, and international development.

The Oxford Handbook of Refugee and Forced Migration Studies-Elena Fiddian-Qasmiyeh 2014-06-12 Refugee and Forced Migration Studies has grown from being a concern of a relatively small number of scholars and policy researchers in the 1980s to a global field of interest with thousands of students worldwide studying displacement either from traditional disciplinary perspectives or as a core component of newer programmes across the Humanities and Social and Political Sciences. Today the field encompasses both rigorous academic research which may or may not ultimately inform policy and practice, as well as action-research focused on advocating in favour of refugees' needs and rights. This authoritative Handbook critically evaluates the birth and development of Refugee and Forced Migration Studies, and analyses the key contemporary and future challenges faced by academics and practitioners working with and for forcibly displaced populations around the world. The 52 state-of-the-art chapters, written by leading academics, practitioners, and policymakers working in universities, research centres, think tanks, NGOs and international organizations, provide a comprehensive and cutting-edge overview of the key intellectual, political, social and institutional challenges arising from mass displacement in the world today. The chapters vividly illustrate the vibrant and engaging debates that characterize this rapidly expanding field of research and practice.

Development-induced Displacement and Resettlement-Hiroyuki Nonaka 2008

Displacement and Resettlement in India-Hari Mohan Mathur 2013-07-18 In the past ten years or so, displacement by development projects has gone on almost untamed under the globalization pressures to meet the demand for land from local and increasingly foreign investors. Focusing on India, this book looks at the complex issue of resettling people who are displaced for the sake of development. The book discusses how the affected farming communities are fiercely
opposing the development projects that often leave them worse off than before, and how this conflict is a matter of serious concern for the planners, as it could discourage potential capital inflows and put India’s growth trajectory into jeopardy. It analyses the challenge of protecting the interests of farmers, and at the same time ensuring that these issues do not hinder the path of development. The book goes on to highlight the emerging approaches to resettlement that promise a more equitable development outcome. A timely analysis of displacement and resettlement, this book has an appeal beyond South Asian Studies alone. It is of interest to policy makers, planners, administrators, and scholars in the field of resettlement and development studies.

Resettlement Challenges for Displaced Populations and Refugees - Ali Asgary
2018-08-16 The main focus of this book is to help better understand the multidimensionality and complexity of population displacement and the role that reconstruction and recovery knowledge and practice play in this regard. According to the UN Refugee Agency (UNHCR), the total number of people forcibly displaced due to wars and conflicts, disasters, and climate change worldwide, exceeded 66 million in 2016. Many of these displaced populations may never be able to go back and rebuild their houses, communities, and businesses. This text brings together recovery and reconstruction professionals, researchers, and policy makers to examine how displaced populations can rebuild their lives in new locations and recover from disasters that have impacted their livelihoods, and communities. This book provides readers with an understanding of how disaster recovery and reconstruction knowledge and practice can contribute to the recovery and reconstruction of displaced and refugee populations. This book will appeal to students, researchers, and professionals working in the field.

Forcibly Displaced - World Bank 2017-08-01 The Syrian refugee crisis has galvanized attention to one of the world’s foremost challenges: forced displacement. The total number of refugees and internally displaced persons, now at over 65 million, continues to grow as violent conflict spikes. This report, Forcibly Displaced: Toward a Development Approach Supporting Refugees, the Internally Displaced, and Their Hosts, produced in close partnership with the United Nations High Commissioner for Refugees (UNHCR), attempts to sort fact from fiction to better understand the scope of the challenge and encourage new thinking from a socioeconomic perspective. The report depicts the reality of forced displacement as a developing world crisis with implications for sustainable growth: 95 percent of the displaced live in developing countries and over half are in displacement for more than four years. To help the displaced, the report suggests ways to rebuild their lives with dignity through development support, focusing on their vulnerabilities such as loss of assets and lack of legal rights and opportunities. It also examines how to help host communities that need to manage the sudden arrival of large numbers of displaced people and that are under pressure to expand services, create jobs, and address long-standing development issues. Critical to this response is collective action. As work on a new Global Compact on Responsibility Sharing for Refugees progresses, the report underscores the importance of humanitarian and development communities working together in complementary ways to support countries throughout the crisis from strengthening resilience and preparedness at the onset to creating lasting solutions.

Development-induced Displacement and Resettlement - Caitlin Smithen 2014

Masses in Flight - Roberta Cohen 2012-01-27 Since the end of the Cold War, increasing numbers of people have been forced to leave their homes as a result of armed conflict, internal strife, and systematic violations of human rights. Whereas refugees crossing national borders benefit from an established system of international protection and assistance, those who are displaced internally suffer from an absence of legal or institutional bases for their protection and assistance from the international community. This book analyzes the causes and consequences of displacement, including its devastating impact both within and beyond the borders of affected countries. It sets forth strategies for preventing displacement, a special legal framework tailored to the needs of the displaced, more effective institutional arrangements at the national, regional, and international levels, and increased capacities to address the protection, human rights, and
reintegration and development needs of the displaced.

**Beyond Relocation** - Renu Modi 2009-07-10 This collection addresses critical issues of development-induced displacement and resettlement by offering empirical evidence from various countries, mainly in Asia and Africa. By presenting a comparative approach, it helps the reader understand and theorise about the nature and characteristics of forced displacement in several countries across the globe. It also studies the interaction among an array of actors; in particular, policy-makers, development agencies, project-affected persons, researchers and NGOs in resistance movements. Most significantly, the study offers measures to reverse and reconstruct impoverishment caused by displacement in a holistic way through benefit-sharing mechanisms which can lead to sustainable resettlement and rehabilitation. Beyond Relocation: the Imperative of Sustainable Resettlement emphasizes the need for reforming laws and policies dealing with displacement and resettlement in the Indian as well as the global context. It analyses the impact issues of risks, impoverishment, entitlements and survival strategies of those displaced. This volume will be of immense value to project planners, funders and implementing agencies in view of the fact that development planners are faced with a daunting task in the process of constructing/improving the existing network of roads, railways and airport facilities which run through existent human settlements and require the acquisition of large tracts of land, leading to involuntary displacement. The essays will also be helpful for researchers engaged in the field of development and displacement studies.

**Resettlement in Asian Countries** - Mohammad Zaman (PhD) 2021 This book examines land acquisition and resettlement experience in Asian countries, where nearly two-thirds of the world’s development-induced displacement currently takes place. Faced with the complexity of balancing legal frameworks and resettlement needs, along with increasing demands for safeguarding displaced peoples, in recent years many countries within Asia have adopted integrated land and resettlement laws. This book presents a comparative review and assessment of the impact of the new land and resettlement laws and regulatory frameworks for expropriation, compensation and resettlement. Written by an international, interdisciplinary team of experts from both practice and academia, the book demonstrates the ongoing challenges and struggles associated with social and resettlement risk assessments, the social and cultural exclusion of indigenous/vulnerable groups in some countries, and the lack of institutional capacity to adequately deal with resettlement management and administration. The case studies and comparative analyses of laws and practices relating to expropriation, compensation, and resettlement make significant contributions to advancing resettlement knowledge and management practices. The book will be useful as a reference for development practitioners, and for researchers across the fields of global development, political science, Asian studies, planning, and law. The book also has potential for use as a resource for resettlement management training programs and graduate level courses/seminars in development studies"--

**Discrimination and Diversity: Concepts, Methodologies, Tools, and Applications** - Management Association, Information Resources 2017-05-17 The growing presence of discrimination and isolation has caused negative changes to human interactions. With the ubiquity of these practices, there is now an increasingly urgent need to close this divide. Discrimination and Diversity: Concepts, Methodologies, Tools, and Applications provides a critical look at race, gender, and modern day discrimination and solutions to creating sustainable diversity across numerous contexts and fields. Including innovative studies on anti-discrimination measures, gender discrimination, and tolerance, this multi-volume book is an ideal source for professionals, practitioners, graduate students, academics, and researchers working in equality, as well as managers and those in leadership roles.

**Resettlement Policy in Large Development Projects** - Ryo Fujikura 2015-06-12 Hydropower generation by construction of large dams attracts considerable attention as a feasible renewable energy source to meet the power demand in Asian cities. However, large development projects cause involuntary resettlement. Of the world’s forty to eighty million resettlers, many resettlers have been unable to rebuild their livelihood after relocation and have become
impoverished. This book uniquely explores the long-term impacts of displacement and resettlement. It shows that long-term post-project evaluation is necessary to assess the rehabilitation and livelihood reconstruction of resettlers after relocation. It focuses on large dam projects in a number of Asian countries, including Indonesia, Japan, Laos, Turkey, Sri Lanka and Vietnam, which are often ignored in Displacement studies in favour of China or India. Drawing on a wealth of empirical data over ten years, it presents crucial factors for successful resettlement by analysing lessons learned. The range of countries allow for a diverse and complex set of factors and outcomes to be analysed. Many of the factors for successful resettlement recur despite the cases being different in implementation period and location. The book presents highly original findings gathered by local researchers in the field directly talking to resettlers who were relocated more than a decade ago. This original book is a unique resource for researchers and postgraduate students of development studies, environment, geography, sociology and anthropology. It also makes policy recommendations for future resettlement programs that are of great value to development policy makers, planners, water resources engineers and civil society protest groups.

The Development Dilemma-S. Parasuraman 2016-07-27 The social, economic and political contexts in which development projects in India are implemented, and consequences to people displaced by such projects, are analyzed in this book. Development, displacement, resettlement and rehabilitation processes related to three major reservoir bases' irrigation and power projects, and three major industrial projects are studied. The role of the State, international agencies and the private industrial sector in promoting development and managing rehabilitation of the displaced people is assessed, and the author proposes a framework for a comprehensive policy on development, displacement and rehabilitation.

Reconstituting the Role of Law in Development-induced Displacement and Resettlement-Jalia Kangave 2011

Loss and Damage from Climate Change-Reinhard Mechler 2018-11-28 This book provides an authoritative insight on the Loss and Damage discourse by highlighting state-of-the-art research and policy linked to this discourse and articulating its multiple concepts, principles and methods. Written by leading researchers and practitioners, it identifies practical and evidence-based policy options to inform the discourse and climate negotiations. With climate-related risks on the rise and impacts being felt around the globe has come the recognition that climate mitigation and adaptation may not be enough to manage the effects from anthropogenic climate change. This recognition led to the creation of the Warsaw International Mechanism on Loss and Damage in 2013, a climate policy mechanism dedicated to dealing with climate-related effects in highly vulnerable countries that face severe constraints and limits to adaptation. Endorsed in 2015 by the Paris Agreement and effectively considered a third pillar of international climate policy, debate and research on Loss and Damage continues to gain enormous traction. Yet, concepts, methods and tools as well as directions for policy and implementation have remained contested and vague. Suitable for researchers, policy-advisors, practitioners and the interested public, the book furthermore: • discusses the political, legal, economic and institutional dimensions of the issue • highlights normative questions central to the discourse • provides a focus on climate risks and climate risk management. • presents salient case studies from around the world.
